HD4BE Serger

Janome's **HD4BE** Serger (Black Edition), with its unique color, certainly makes a bold impression. With an electronic foot control, this is an advanced overlocker with 2 needles and 2, 3, or 4 thread overlock stitching. The differential feed ratio, which is adjustable from 0.5 to 2.25, provides exceptional control for handling all types of fabrics and for creating desired special effects. Color-coded thread guides help with machine threading. The guide is automatically returned to its normal position when you turn the balance wheel. The thread tension automatically releases when you lift the presser foot so you can draw through the threads smoothly. The HD4BE also lets you quickly switch to rolled hemming without changing the needle plate. A lower looper pre-tension stitch eliminates the need to change tension for rolled hems.

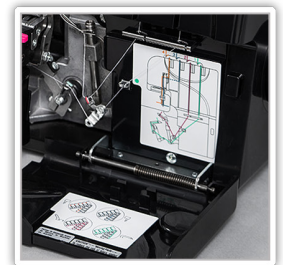

Lay-in Thread
Tension Dials

Adjustable Cutting
Width

Perfect companion for
HD9BE Professional Machine

Color-coded
Thread Guides

Features

- Speeds up to 1,300 SPM
- 2, 3 and 4 thread convertible
- Adjustable cutting width from 3.1mm - 7.3mm
- Changeable thread guide
- Color-coded thread guides
- Easy threading lower looper
- Lay-in thread tension dial
- Differential feed ratio from 0.5 to 2.25
- Retractable upper knife
- Adjustable foot pressure
- Easy-to-read threading chart
- Quick change rolled hem
- Snap-on presser feet
