

Professional Grade Needle Plate HP and Professional Grade Foot HP

This is a set comprised of a slim and compact presser foot and special matching needle plate. The foot utilizes the left side feed dogs.

Very convenient and safe

When the professional grade needle plate HP is attached, the stitches for the professional grade foot HP are automatically displayed. A sensor under the needle plate detects the plate and automatically changes to the correct screen. For convenience and safety, the needle position is fixed at 0.5.

Continental Series HP Plate

Continental Series Screen

The narrow foot is good for sewing curved

Utilize this narrow gauge industrial type foot for curves and precise topstitching and experience the great ease of control and superior visibility it offers.

By matching the edge of the foot against the edge of the fabric, you can sew a scant 1/4" seam allowance!

It's sized perfectly for creating scant 1/4" seams. This foot will surely become a go-to item for accurate piecing even for curves and small pieces of fabric!

**When piecing, change the stitch length to 1.5-2.0 (the recommended stitch length for piecing is 1.8).*
